SUMMARY

Full-stack engineer with hands-on Java, Spring Boot and Angular delivery across academic and professional projects. Built a Spring Boot + Angular medical platform with JWT auth and AI-assisted analysis, plus an e-learning platform. Delivered production HR and e-sports systems in Node.js, React and Flutter, using AI tools daily for development.

EDUCATION

Engineering Degree in Computer Science | ESPRIT | Tunisia Sep 2023 - Expected Oct 2026

- End-of-study project: Talent Manager, a full-stack HR talent management platform (Flutter Web + Node.js/Express + MongoDB), with a written end-of-study report.

Bachelor's Degree in Information Systems Development | ISET Rades | Tunisia Sep 2020 - Jul 2023

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, C#, SQL (MySQL), Dart
Backend: Spring Boot, Node.js, Express.js, REST APIs, JWT
Frontend & Mobile: Angular, React, Next.js, Flutter, HTML5, CSS3
Data & AI: MongoDB, MySQL, LLMs, RAG, AI Agents, Tool Calling
Tools & DevOps: Git, GitHub, Docker, CI/CD, Vercel, Agile

EXPERIENCE

Full Stack Developer | Telnet | Tunisia Feb 2026 - Oct 2026

- Designed and developed Talent Manager, an HR platform with a Flutter Web app for HR teams and a mobile app for engineers on a shared Node.js/Express and MongoDB backend.
- Built HR modules for recruitment, candidate tracking, skill management, 9-Box evaluation, objectives, reviews and HR statistics.
- Integrated three AI agents powered by LLaMA via Groq: a RAG assistant, an automated CV analyzer, and a tool-calling agent that executes business actions with user confirmation.
- Integrated Slack, GitHub, Cloudinary and Nodemailer with JWT authentication and role-based access control.
- Deployed the backend on Vercel with REST APIs connecting the web and mobile apps.

Full Stack Developer | Defendr | Tunisia Jul 2025 - Sep 2025

- Developed a Next.js dashboard for managing e-sports tournaments, including tournament organization and administrative workflows.
- Built responsive, reusable UI components with React and TypeScript, and integrated REST APIs with real-time updates.

Blockchain / Full Stack Developer | Slide | Tunisia Jan 2023 - Jun 2023

- Developed a Bitcoin wallet (MERN stack) with secure authentication and transaction workflows, plus an automated Dollar-Cost Averaging (DCA) strategy.
- Used Git and Docker for version control and deployment; followed Agile practices across the project lifecycle.

Full Stack Developer | Tetra | Tunisia Jan 2022 - Jul 2022

- Developed and maintained web applications with React and Laravel, and worked with Git and CI/CD pipelines.

PROJECTS

Intelligent Medical Application | Spring Boot, Angular, JWT, AI | Academic

- Built a medical platform with secure JWT authentication and role-based access.
- Added AI-assisted symptom analysis and an appointment-management workflow.
- Designed the backend with Spring Boot REST APIs and an Angular frontend.

Khotwa - E-Learning Platform | Angular, Spring Boot | Academic

- Built a platform for managing courses, users and e-learning activities, with a Spring Boot REST backend and an Angular frontend.

Tuniimmo - Tunisian Real Estate Platform | Angular, Express.js | Academic

- Built a listings platform with search, browse and publish flows, role-based features for standard and premium users, and a premium listing system with 360-degree viewing.
